ОТЧЁТ ПО ЛАБОРАТОРНОЙ РАБОТЕ

Лабороторная работа №4

Выполнил студент:

Жарков Григорий Алексеевич
группа: M32071

Проверил:

Чикишев Константин Максимович

Санкт-Петербург,
2022 г.

1.1. Текст задания

4 лабораторная
Владельцы недовольны, что информацию о котиках может получить кто угодно. В этой лабораторной мы добавим авторизацию к сервису.
Добавляется роль администратора. Он имеет доступ ко всем методам и может создавать новых пользователей. Пользователь связан с владельцем в соотношении 1:1.
Методы по получению информации и котиках и владельцах должны быть защищены Spring Security. Доступ к соответствующим endpoint'ам имеют только владельцы котиков и администраторы. Доступ к методам для фильтрации имеют все авторизованные пользователи, но на выходе получают только данные о своих котиках.
Внимание: эндпоинты, созданные на предыдущем этапе, не должны быть удалены.

1.2. Решение
